**DECLARATION OF**

1,        My name is Craig Pintens. I am 32 years old. I reside in Milwaukee, Wisconsin. .

2.        I am the Associate Athletics Director at Marquette University and have been involved with basketball statistics and record-keeping for over twenty years.

3.        I have prepared this declaration in support of the patentability of U.S. Patent No. 10/784,635.

4.        I was introduced to JocTrac over a year ago and we used it at Marquette University to track our men's basketball games during the 2007-2008 season.

5.        JocTrac is one of the most innovative enhancements in basketball statistic keeping. I have not seen statistics software remotely close to JocTrac in terms of capability. JocTrac actually tracks each pass made by a player, enabling an output of time of possession, who the player passed to and what the result of each time the player touched the ball. To my knowledge, there is no other basketball software that does this. The amount of reports JocTrac outputs is second to none, based on its unique possession tracking dimension.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under 18 U.S.C. 1001 and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
